

CNC Press Brake Supervisor (Night shift)

Location: Dudley Area

Salary: £40-45K (negotiable) + Bonus package

Who are we?

Accurate Laser Cutting Ltd are a leading sheet metal sub-contractor based in Oldbury, West Midlands. Established in 2005, we offer a bespoke laser cutting and forming service to a wide range of industries across the UK.

Our press braking section is an exciting, varied and busy department. We deal with various engineering sectors & materials so the day to day role will always be diverse. Our convenient location, just on the outskirts of Dudley, West Midlands, means our premises are easily accessible via bus, car & train.

What are we looking for from a CNC Press Brake Supervisor?

- Previous supervision experience preferred
- Will have experience of setting and operating CNC press brakes, ideally with knowledge of Bystronic and Trumpf press brakes and tooling
- Have an understanding of technical engineering drawings
- Must be proactive, willing to work as part of a team
- Strong communication skills
- Punctual, reliable and flexible

What will your duties be working as a CNC Press Brake Supervisor?

- Operating various Bystronic and Trumpf press brakes ranging from 40T – 320T
- Be responsible for own inspection of parts and follow quality procedures
- Producing complex parts and working to required tolerances
- Communicating with other members of the press braking department to prioritise work under a busy schedule

You will be working in a small but fast paced production team

- Working hours 6PM – 6AM Monday – Thursday

Why should you apply for the role of CNC Press Brake Supervisor?

- Competitive salary package
- Benefits – Company bonus scheme & Paid overtime
- Onsite Parking
- You will be joining a growing company that continually invest in people and technology

When do we need you?

- ASAP – notice periods will be accepted
